Principal: Narelle Kusabs

Term 2 Week 8 Thursday 17th June 2021 Deputy Principal: Toni Webster

From The Leadership Team

Nature Play Upgrade

An upgrade to our nature play area has been approved and should be starting soon. We are adding a creek area and a water course. Water will be available for use in this area in summer.

Reports

It's that time of year when our first written reports are being finalised and will be coming home at the end of term. Following is some information regarding assessment and reporting. If after reading this information you have questions please make an appointment to come and have a chat.

Assessment & Reporting Information for Parents

The Australian Curriculum specifies the knowledge, understanding and skills to be taught and learned within a given subject area from Reception to year 10. Each content area is accompanied by an Achievement Standard. Achievement Standards refer to the quality of learning (the depth of understanding, extent of knowledge and sophistication of skill) demonstrated by students within a given subject. A national approach requires all States and Territories to report student achievement using a 5 point rating.

An information sheet for parents about the Australian Curriculum at the appropriate year level will be included with each report

To provide a universally consistent base for school/teacher judgement of student learning across R -10 schools, the "C grade" will indicate that the student has demonstrated satisfactory achievement of what is expected against each Achievement Standard. The learning standard described by each of the Achievement Standards embodies high expectations of learning achievement. To be awarded a "C" grade using these standards represents a significant achievement.

How do teachers allocate grades using the Achievement Standards of the Australian Curriculum?

Teachers use a range of different quality assessment strategies and tools to gather evidence of student achievement with reference to the Australian Curriculum and the Achievement Standards. Based on the evidence, teachers make an on balance judgement to assess student achievement in awarding a grade. When using the Achievement Standards, there is an expectation that each Standard is considered as a whole and not broken down in to individual statements and viewed as a check list. The student learning outcomes on school based reports reflect the learning outcomes from units of work and major assessment items taught. These in turn will incorporate language from the curriculum skills and understandings in both the content and Achievement Standards. A-E grades and the accompanying comments are one aspect of reporting to parents/carers/ guardians. The report can also provide information about:

- * a student's strengths and areas for development
- * information about their social development
- strategies to assist their progress
- involvement in school programs and activities
- * attitude and commitment to learning
- * attendance

Parent Group Currently Postponed

School Assemblies Currently for students only

Important Dates

Fri 2nd July Term 2 Ends Early 2pm dismissal

(check out the free or low cost school holiday activities run by the Salisbury Council on the back page)

Wed 4th Aug Governing Council

Thurs 12th Aug 9am Principal's Tour

AUSTRALIA

We have had a very busy term learning about Australian animals and reading Dreamtime stories.

These are some of our favourite activities.

Mrs Cava - Reception

Parent Information

Reminders

Uniform

Uniform orders have closed for this term but will be available again early Term 3. Please ensure you order the correct sizing of items as they are not able to be returned as they are made to order.

Please note we do not keep stock of uniform items although we do have some sample sizes to look at/try on. Our uniform is made to order so cannot be returned due to incorrect sizing. If you need help or require adult sizes and pricing please see front office staff.

Uniform pricing and sizing information is available at the front office and also online on our Skoolbag app.

Head Lice

Head lice are tiny wingless insects about the size of a sesame seed that live in the hair of humans and animals where they feed on blood by biting the skin.

How head lice spreads

Head lice commonly affects children, however adults can also get it.

It can be passed between people by contact with personal items, for example shared combs and brushes. Lice need warmth and blood to survive. They do not live for long on clothing, bedding or personal items.

Head lice symptoms

Lice often cause itching of the skin, but this is not always the case. Bites can cause the skin to become red and irritated, which can be made worse by scratching.

You can see the lice and nits (eggs) if you look closely at your head and scalp. Nits look like tiny white dots attached firmly to the hair. They cannot be brushed or flicked off the hair, but must be physically removed with fingers or fingernails.

Head lice treatment

Treating head lice involves the removal of head lice and nits from the hair by either using the conditioner and comb method, or chemical treatments.

The <u>conditioner and comb method</u> involves the use of conditioner and a special metal fine-toothed nit comb. The conditioner briefly stuns the lice making it easier for the nit comb to trap and remove the lice and nits.

If you decide to use a <u>chemical</u>, it is important that you follow the instructions closely that come with it. 2 to 3 chemical treatments with a week in between each should remove living lice. No single chemical treatment will work for everyone. A nit comb can be used to look for any signs of living lice.

Children can return to school once effective treatment has commenced.

For further information about head lice and treatment visit:
